

ATTN PADDLERS:

7/1/25

There is a large total blockage on the Kickapoo River between Landing 12 and Bridge 13.

Portage is extremely difficult at the blockage. The banks are very steep and muddy both upstream and downstream of the blockage. Water levels in the river, are above normal and the water is fast moving.

We recommend avoiding the section of river between Landing 12 and Landing 14 until crews are able to clear the blockage.

If you have questions, please reach out to the Visitor Center.
